Airline Safety Event Sharing Systems Prototypes *xwave System*

Robert Aubé

Project Manager, xwave solutions

Contractor to Transportation Development Centre, Transport Canada

Outline

- **System Overview**
- **Using the System**
- **System Architecture**
- **Features**
- **Security**
- **Cost**
- **Screen Captures**
- **Prototype URL**

Overview

- **Web tool used to query participating airline safety data**
- **User can contact the originator of an SSR (Standard Sharing Report)**
- **Data is extracted from the existing airline safety database into a database subset through an automated process**
 - Airlines only make available the data **they** choose

Overview

- **System has access only to the database subset**
- **System can be configured to query any airline system**
 - BASIS, AQD, AVSHARE, AERO, In-house system, etc.

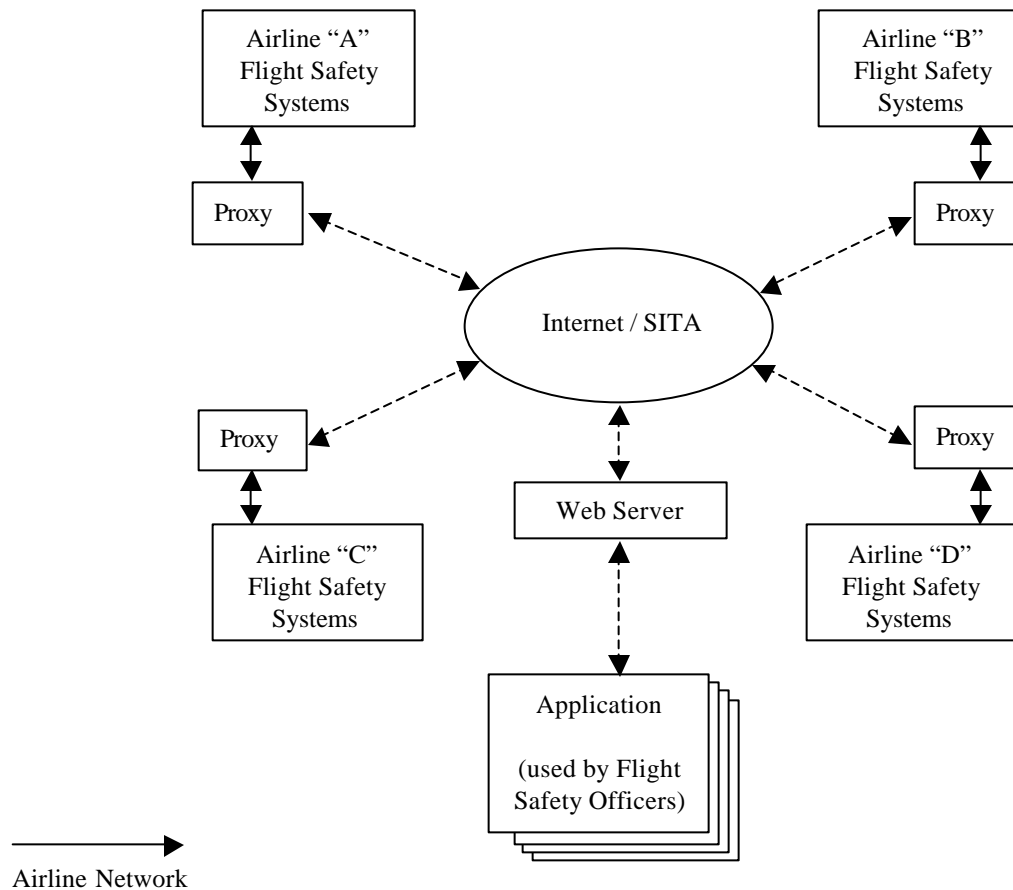

System Operation

- User logs into a Web site with an 128-bit browser
- Search criteria is entered
- Query is submitted to the Web Server
- Web server queries each airline database subset
- Web server displays the results in the SSR format
- User can send a message to the originator requesting additional information
- Originator contacts the user (optional)

System Architecture

—————>
Airline Network

- - - - ->
Encrypted

Features

- **Very secure**
- **Easy to use**
- **Instant results**
- **Web server centrally controls access**
 - **Airline/User profile updates**
- **Broadcast capability**
- **Anytime, anywhere real-time system**
- **No software updates required**

Security

- **Web server is a 'known host', and is the only server able to connect to the airline proxy**
- **128 bit data encryption**
- **Remaining connections are over a VPN (Virtual Private Network)**
- **Failed logon attempts are logged**
 - **3 consecutive attempts trigger a notification**

Setup & Operating Costs

- **One time initial cost to create database subset and the automatic extraction process.**
- **Yearly maintenance estimated at 1 person day per year.**
- **No software requirements other than a 128 bit Web Browser.**
- **Proxy PC connected to Internet/SITA.**

Screen Captures - 1/5

The screenshot shows a Netscape browser window titled "xwave system login - Netscape". The address bar displays "http://urlgoeshere.com/login.html". The page content includes the text "xwave solutions System" in orange, followed by a large orange "Login" heading and a horizontal line of orange dots. Below this, a message reads: "Please enter your Username and Password, and press 'Continue' to access the system." There are two input fields: "Username:" and "Password:". A "Continue" button is positioned below the password field. At the bottom of the page, a disclaimer states: "The is a restricted site. All logins are logged. Unauthorized access is prohibited." The browser's status bar at the bottom shows "Document: Done".

Screen Captures - 2/5

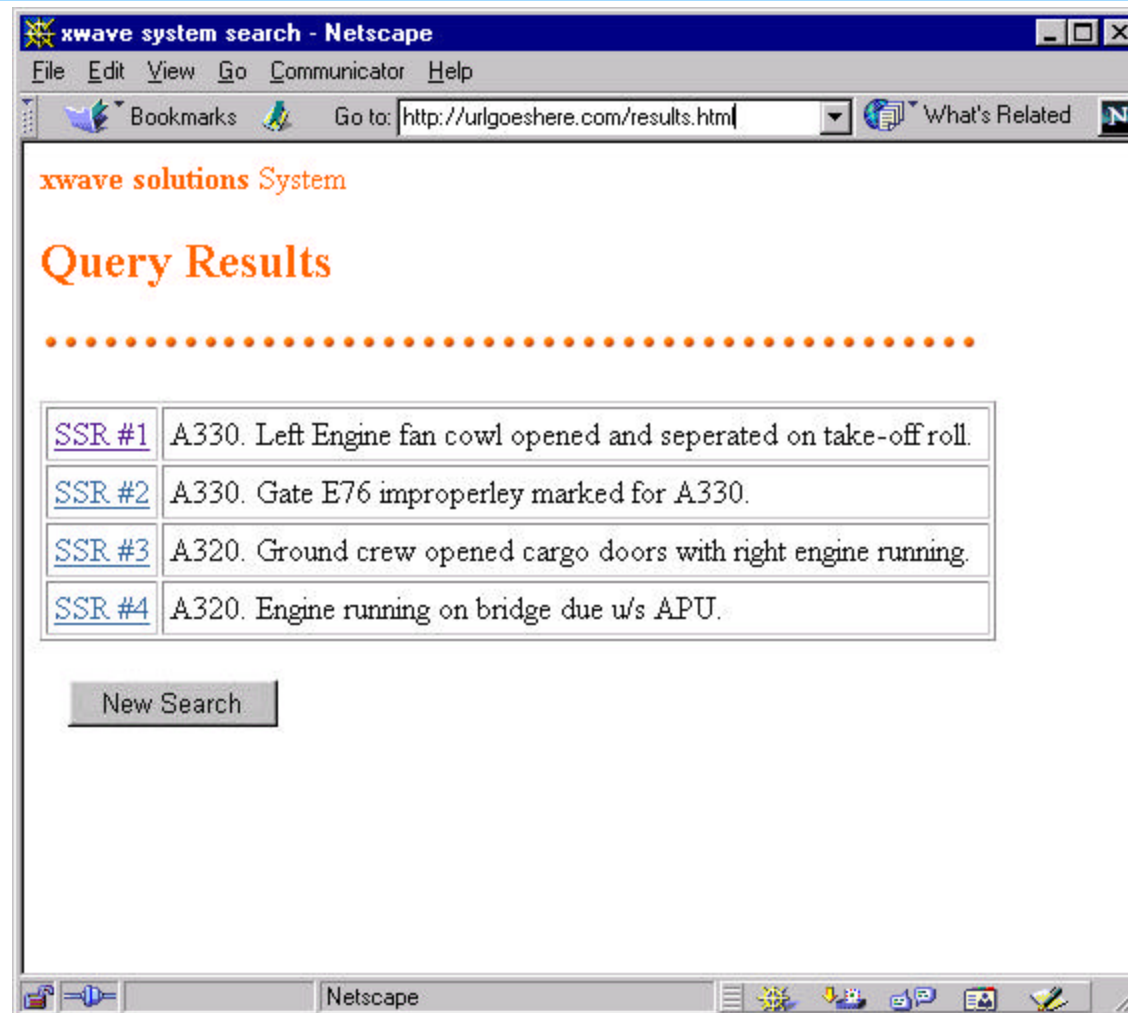

The screenshot shows a Netscape browser window titled "xwave system search - Netscape". The address bar displays "http://urlgoeshere.com/search.html". The page content includes the heading "xwave solutions System" and a "Search" section. Below the heading is a horizontal line of orange dots. The search instructions state: "Enter your search criteria and press the 'Search' button to query all participating airlines." The search form contains the following fields:

- Date:
- Aircraft:
- Event Category:
- ATA Code(s):
- Phase of Flight:
- Airport (3 letter or ICAO):
- Event Description: Keyword(s):

The browser's status bar at the bottom shows "Document: Done".

SSR #1

.....

Date:	3/17/2000
Aircraft (M-M-S):	A330
Event Category:	-
ATA Code:	-
Phase of Flight:	Take-off
Airport (3 letter or ICAO):	YVR CYVR AC YVR
Weather Condition(s):	-
Event Description:	Left Engine fan cowl opened and seperated on take-off roll. Aircraft damaged and returned for safe landing in YVR. Full Report Attached.

Document: Done

Screen Captures - 5/5

The screenshot shows a Netscape browser window titled "xwave system search - Netscape". The address bar displays "http://urlgoeshere.com/contact1.html". The page content includes a title "Contact Form for SSR #1" in orange, a horizontal line of orange dots, and a paragraph: "Please complete the form below and press the send button. The originator of SSR #1 will be notified of your request for additional information." The form consists of five fields: "Name:", "Telephone:", "Fax:", "Email:", and "Memo:". The "Memo:" field is a larger text area. A "Send" button is located at the bottom of the form. The browser's status bar at the bottom shows "Document: Done".
